1

1) Remove the original AUX/USB socket from the dashboard and unplug the connectors behind it.

5

5) Put in place the supplied USB interface, the plastic cover and fix it with the previously saved screws.

2

2) Unscrew it by using the screwdriver and save the two screws as shown in the picture.

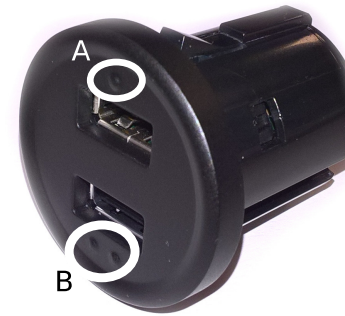

6

6) Plug it into the dashboard with the supplied cable by paying attention to connect the two connectors with the same colors, brown with brown and green with green.

3

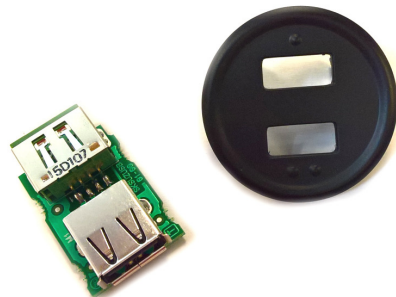

3) Remove the original front cover and then remove the original jack PCB interface from the AUX/USB socket.

**PLEASE NOTE:**  
A - **one dot** = shows the hole for the original included USB interface  
B - **two dots** = shows the hole for the supplied USB interface

4

4) Take the supplied USB interface and the double plastic housing.
