

SPH-DA01 - CHANGE HISTORY

Ver2.63

- ✓ Added a general setting for the "App Launch Assist".
 - ✓ OFF: AppRadio.App is to be launched from iPhone.
 - ✓ ON : AppRadio.App is launched from AppRadio*.
 - *Pop-up will be displayed when you launch the App on the iPhone = Default
- ✓ Minor bug fixes for the FM Radio function

Ver2.56

- ✓ Support for call-waiting
- ✓ Minor bug fixes for the Tuner functions
- ✓ Minor bug fixes for the Phone functions

Ver2.50

This new version contains the following improvements:

1. Bluetooth

- ✓ Bluetooth pairing time shortened
- ✓ Recent call history is synced automatically
- ✓ Correct contact name visible when placing outgoing call
- ✓ Contact name will appear when placing outgoing call and dialling sound can be heard

2. Others

- ✓ Incorrect clock updates fixed by dropping "RDS CT" function, bad data was received from broadcaster
- ✓ Pressing home button in compatible app goes to AppRadio app directly, no temporary display of home screen
- ✓ Fast double click on home button better recognised

3. New

- ✓ Bluetooth pairing icon added to home and tuner screen

Ver2.45

- ✓ Support for iOS5.
 - NOTICE: Due to the iOS specification, the AppRadio screen goes black for the "Contacts" application in Advanced App mode. The call itself is not affected. In order to end the call, please operate your iPhone.
- ✓ Now Possible to check the "Software Version" in the Setting screen
- ✓ Minor Bug fixes.

Ver2.22

- ✓ Bug fix: It doesn't return to former source after interrupt ends if the source is done to generate the interrupt of the telephone and back camera during playback.
- ✓ Enhances stability of Bluetooth connection.
