

Pioneer is an international company in which more than 8000 employees worldwide develop and produce innovative, high-tech car entertainment products. Our goal? Making your mobility experiences safer, smarter and more comfortable.

Would you like to help carry this vision forward? You can!

Pioneer Electronics is planning to set up a new development center in Germany (Wetzlar) to support our car entertainment business.

To strengthen this engineering team, we are looking for a **Software integrator**.

### **Your responsibilities:**

- Combine software deliveries from 3rd parties and commits from internal developers to stable software releases
- Support the program/project manager to achieve milestones in time and in quality
- Perform code reviews and assist on complying to coding guidelines and development process
- Maintain and improve DevOps toolchain and build system
- Create release documentation
- Support colleagues on creating and extending build systems for projects

### **Required skills?**

- At least 10 years of experience in software development of in-car electronics
- Excellent knowledge of GIT concurrent version system
- Excellent knowledge of C and C++
- Excellent knowledge of CMake build systems
- Good knowledge of Jenkins, Jira and Confluence
- Experience in configuring and using Docker is a plus
- Good English skills in speaking and writing, German is a big plus

### **Interested?**

Send your application & CV to [Wetzlar@pioneer.eu](mailto:Wetzlar@pioneer.eu) and we will contact you!
