

Philosophy of Environmental Preservation

The Pioneer Group will make efforts to always contribute to maintaining and realizing the rich and safe global environment through our corporate activities, based on the general understanding that it is one of our corporate missions to maintain, improve, and hand over the global environment to the next generation.

Basic Policies of Environmental Preservation

Based on the Philosophy of Environmental Preservation and environmental impact by our business activities following focal points are recognized for our continual improvement

- **Prevention of Global Warming**
Efforts shall be implemented to reduce energy use and greenhouse gas emissions attributable from our business activities and the product's life cycle.
- **Conservation of Resources, and Recycling**
Strive to reduce use of materials and resources in the business process, and to promote recycling of resources as much as possible.
- **Management of Chemical Substances**
Manage a secure control for the use of chemical substances, and to continuously reduce or strive for alternatives regarding potentially hazardous chemicals that may be harmful. Moreover, in using chemical substances, efforts shall be made to prevent pollution.

The following basic approaches are taken in promoting the environmental protection activities

- **Compliance to Laws and Regulations**
While complying with applicable environmental laws and regulations, establish voluntary management standards necessary to perform the business activities
- **Disclosure of Information, and Communication**
Provide environment related information to the stakeholders, and respect the opinions widely from both inside and outside the company advantageously for environmental activities.
- **Environmental Education**
While having awareness for environmental preservation, promote environmental education and training with the aim of developing human resources to enable taking action to environmental activities.
- **Continual improvement**
We shall continuously maintain and improve our environmental management system and protection activities by understanding our environmental performance and taking appropriate measures in accordance with the results of environmental audits.
