Pioneer

Pioneer is an international company in which more than 8000 employees worldwide develop and produce innovative, high-tech car entertainment products. Our goal? Making your mobility experiences safer, smarter, and more comfortable.

Would you like to help carry this vision forward? You can! To strengthen our Automotive Sales team, we are looking for a **QA engineer**.

Your responsibilities:

- Be a single point of contact for our German OEM customers concerning all quality-related issues from the Pre-RFQ phase until the life period.
- Execute technical analysis of quality problems during mass production and coordinate warranty analysis to be reported in time to meet customer-specific requirements.
- Support customer audits at our mass production facilities and follow up on the actions until final resolution.
- Participate in APQP meetings in the worldwide organization in relation to your customer projects.
- Act as a quality system representative for IATF16949 and plan and coordinate internal audits and audits with external partners.

Do you recognize yourself in this?

- Minimum 5 years of experience with German automotive car manufacturers as a quality engineer.
- Understanding and/or experience with the quality requirements of an automotive device development process.
- Have experience with quality systems IATF16949, VDA and related auditing.
- Able to travel from time to time to have direct contact with the customer to discuss face-to-face.
- Very good German & English language skills.
- Knows how to organize the work independently & takes initiative.

We offer you:

- An attractive salary package.
- Hybrid working from home regime to ensure a positive work-life balance.
- Various training opportunities to enhance your skills and career.
- Exciting projects in the automotive industry with renowned OEMs.
- An international working atmosphere in an innovative company.
