

Pioneer is an international company in which more than 8000 employees worldwide develop and produce innovative, high-tech car entertainment products. Our goal? Making your mobility experiences safer, smarter and more comfortable.

Would you like to help carry this vision forward? You can!

Pioneer is setting up a new development center in Germany (Wetzlar) to support our car entertainment business.

To strengthen this software engineering team, we are looking for an **IT & DevOps expert**.

Your responsibilities:

- Setup, maintain & continuously improve our IT Infrastructure, server, cloud technologies, network, notebooks, printer, etc.
- First level support for IT technical issues.
- Build our DevOps system & maintain and improve our DevOps toolchain.
- Continuous improvements of tooling and scripts to support our car-electronic projects.
- Support your colleagues on creating and extending build systems for projects.
- Ensuring reliability, availability and maintainability of IT and DevOps related topics.

Required skills?

- At least 5 years of experience in IT-Infrastructure, Linux and DevOps.
- Excellent knowledge of GIT concurrent version system.
- Experience in configuring and using Docker is a plus.
- Basic knowledge of UML required.
- Python scripting, C and C++ programming knowledge.
- In-Depth Knowledge of DevOps Tooling e.q.: Confluence, Jira and other DevOps tools.
- In-Depth Knowledge of IT-Infrastructure, notebook setup, server, Microsoft 365, VPN, Backup-System, ...
- Experience in cloud technologies
- Good English skills in speaking and writing, German is a big plus.
- Hands-on mentality
- Considered as a big plus: Automotive background & experience in Artificial Intelligence
